

# Inclusive Child Care Program

**Parents did you know...**the Inclusive Child Care Program is available for Day Care, Day Home and Preschool families? The program is free and voluntary for any parent or guardian who has concerns about their child's development...including behaviors!

-  Are you worried about how your child communicates or that others are not able to understand what he/she is saying like you do?
-  Concerned how your child expresses their emotions or reacts when feeling frustrated, angry or disappointed?
-  Does he/she seem clumsy, lacking good coordination and balance?
-  Is your child easily upset, overwhelmed or seemingly out of control and adults cannot figure out why?

## Inclusive Consultants are here to help!

A Consultant will:

Discuss your concerns with you. ICC promotes family centered practices by acknowledging and respecting the priorities your family has for your child.

Use screening tools to assess your child's cognitive, physical and social-emotional development. Information gathered will be used to identify their strengths and show any areas where they may need support.

Look too at environmental factors within your child's program that could be affecting or interfering with their ability to participate happily and meaningfully.

Work with you and the child care staff as a team to create Individual Program Plans with developmentally appropriate goals and activities to help your child master new skills through play.

Provide on-site support within the program to help ensure your child's success.

## For More Information

If you have any questions or would like to refer your child to the program, speak to your Centre Director/Early Childhood Educator or call an Inclusive Consultant nearest you.
